

I AM PATIENT SAFETY

PENN STATE HERSHEY CHILDREN'S HOSPITAL

Recognized for her dedication to patient safety by the Pennsylvania Patient Safety Authority

Tammy Angeletti is committed to patient safety in her role as a Respiratory Therapy Clinical Specialist at Penn State Hershey Children's Hospital. While providing care for a child with a tracheostomy tube, Tammy recognized a variable connection issue between the oxygen delivery device and the tracheostomy tube. She worked with a manufacturer to develop a device that would provide a standard connection, eliminating any variation to the oxygen set-up.

Join the Pennsylvania Patient Safety Authority in congratulating Tammy Angeletti for making patient safety a priority in her job at Penn State Hershey Children's Hospital.
