

I AM PATIENT SAFETY

- ✓ I encourage patients to take part in decisions about their healthcare by urging them to ask questions about anything they may not understand.
- ✓ I recognize that rules, regulations and procedures in my facility are there to help me promote a safe environment for my patients and co-workers.
- ✓ I practice with a questioning attitude and clearly communicate and document information for my co-workers to safely care for my patients.
- ✓ When I see something happen that can lead to patient harm, I voice my concerns.
- ✓ When handing off a patient or receiving a patient from a handoff, I listen and communicate effectively with my co-workers.
- ✓ I promote the highest standards of practice and behavior to reduce the risks of patient injury.
- ✓ I keep up to date with patient safety literature including the Patient Safety Authority's Patient Safety Advisories.
